

fxBridge Technologies Partners with FIX Flyer to Add Full FIX Integration and Compliance to Their ProTrader Plus™ Dealing Platform for Forex, CFDs and Options

Atlanta, GA, September 12, 2007

Recognizing the demand for a comprehensive Forex, CFD, and Options dealing solution from the financial community as well as the ease of implementation and management that the FIX messaging standard offers, FX Bridge has partnered with FIX Flyer to bring the best dealing platform and integrating protocol to this marketplace.

“We have received an incredible response from the global brokerage community for our best in class trading and dealing platform,” comments James Friedman, Director of Marketing for fxBridge. “Building in full FIX messaging integration and compliance was a natural next step for us. FIX Flyer brought their expertise and commitment to the highest standards in the industry to make a perfect match.”

“FIX Flyer is excited to partner with fxBridge to expand trading speeds and interoperability to their global partners and customers,” noted Brian Ross, CEO of FIX Flyer. “. By leveraging FIX Flyer’s leading next-generation network and integration services, fxBridge can focus their efforts on bringing their powerful trading and dealing platform to clients in the US and around the world.”

About FX Bridge Technologies

Based in Atlanta, Georgia, FX Bridge was founded in 1999, and is a global provider of the next-generation dealing platform for Forex, CFD and options. Their ProTrader Plus™ and BridgeTrader™ platforms serve international dealing and trading, bringing the multitude of trading strategies only available with spot and options. Recognized for their “Total Position Awareness”, risk management and reporting tools and intuitive front end, fxBridge provides the dealer, the broker, and the trader the tools to be successful. Visit www.fxbridge.com for more information.

About FIX Flyer

Based in Tribeca, New York City, FIX Flyer was founded in 2005 by George Kledaras, Randy Prager and Brian Ross, pioneers in developing advanced technology for managing high-volume, multi-asset institutional securities trading using the FIX Protocol. FIX Flyer provides zero-install and fully hosted web applications to manage algorithmic trading and fund allocations for new breed portfolio managers. The Flyer Engine is the first FIX server designed to manage high volume, ultra-low latency trading networks and ECNs for scaling to thousands of connections. Visit www.fixflyer.com for company information and to download the Flyer Engine for free. FIX Flyer is a member of the FIX Protocol LTD, the industry led standards organization.
