

FXBridge Technologies Partners with TeleTrader AG Adds TeleTrader Professional to Their ProTrader Plus™ Dealing Platform for Forex, CFDs and Options

Atlanta, GA, September 12, 2007

FX Bridge Technologies and TeleTrader Software AG have entered into a strategic alliance to bundle the TeleTrader Professional charting and analytical software with FX Bridge's ProTrader Plus Forex dealing platform. Once the implementation is complete, FX Bridge's client will have access to the industry leading features of FXB's Total Position Awareness™ and risk management suite with TeleTrader's industry leading real-time price, charting and technical analysis software.

According to James Friedman, Marketing Director with FXBridge, "Our clients need a complete solution. Standardized options brings more deal-flow with far better trading strategies than spot trading alone. The Forex marketplace is demanding our options product for two reasons: traders need options to implement increasingly sophisticated trading strategies and dealers need new profitable products to offer to maintain their competitive advantage and brand differentiation in an increasingly crowded spot marketplace. Our state-of-the-art risk management and back-end services empower dealers to maximize their profit. Now with TeleTrader Professional, our front-end empowers the trader to see all the needed information and analysis to trade intelligently." Robert Dannbauer, CTO with TeleTrader adds, "TeleTrader has always sought the best in its business partners. FXBridge brings us a new market segment for dealers who want to provide standardized options on FOREX and CFDs."

FX Bridge Technologies, Inc.

Based in Atlanta, Georgia, FXBridge was founded in 1999, and is a global provider of the next generation dealing platform for FOREX, CFD and Options. Their ProTrader Plus and BridgeTrader platform serve international brokerage and investment customers, bringing the multitude of trading strategies only available with spot and options. Recognized for their "Total Position Awareness", risk management and reporting tools and intuitive front end, FXBridge provides the dealer, the broker, and the trader the tools to be successful.
